FULL STACK SOFTWARE ENGINEER

Software Engineer with working knowledge of Ruby on Rails and JavaScript/React/Redux based programming. Familiar with Data Structures. Background in business administration with experience in account management and working directly with clients. That has helped me to have a strong attention to details. I always wanted to find a job where I would constantly learn new things. Doing the Software Engineering Bootcamp has taught me that not only I love coding, but also that as a developer I'll always be learning throughout my career, and I'll be challenged to solve problems. I'm looking for an amazing opportunity, a position in a collaborative work environment where I can bring my best for the development of the company and also learn and improve my skills.

TECHNICAL SKILLS

Ruby, Rails, SQL, JavaScript, React, Redux, PostgresQL, RESTful, APIs, Bootstrap, Firebase, Cloud Firestore. Object-oriented programming. I'm excited to learn new technologies.

TECHNICAL PROJECTS

Interview Tracker - Github | Demo
I created a single page React web app with a Rails API for individuals who want to keep track of their job applications
- App built with Rails as a backend and JavaScript, React.js and Redux as front-end. Used sessions to store user's data
- PostgreSQL as a database
- Bootstrap, HTML, CSS to style the website

Choco Gourmet- Chocolate Store - Github | Demo
Chocolate store where a user can buy their favorite chocolates online
- Used rails as a backend and vanilla JavaScript. Also, HTML, CSS
- SQLite to keep track of data
- Utilized localStorage to store encrypted user information client-side

Sabores del Mundo-Recipe Finder - Github | Demo
Recipe finder. A user can find other user's recipes and can create their own recipes
- App built with Rails. RESTful API for users to save their recipes. Utilized BCRYPT to store encrypted user information for security
- Database using SQLite
- Added HTML and CSS
